

NearZERO Steel 2030

Supply

Join us to share your aspirations and plans to supply near-zero emissions iron and steel

The World Economic Forum's First Movers Coalition are seeking suppliers of iron and steel to share their aspirations, plans and obstacles to produce near-zero emissions products.

[Join the Challenge](#)

Near Zero Steel Supply Challenge Objectives:

- Identify the global supply of near-zero emissions steel and understand what year this will be available
- Connect low-carbon iron sources with steelmakers seeking to produce near-zero steel
- Through the Demand Challenge, show steelmakers the aggregated demand for near-zero steel
- Start procurement discussions that could lead to offtake agreements with steel buyers
- Spotlight the impediments to near-zero steel production and seek to overcome those challenges
